Expect *More* from

A Single Search is Just the Beginning...

Critical Components of a Discovery Service:

What You Previously Accepted from a Discovery Service

What You Can Expect with *EBSCO Discovery Service* (EDS)

Single Search of Your Collection

High-End Indexing and Full-Text Searching (p. 6-7)

Brings Top Subject Indexes into the Experience Using *Platform Blending*™ (NOT Federation) (p. 8-11)

Full-Featured User Experience – Often with Full Text Directly Available (p. 36)

Enhanced Customization Options (p. 37-38)

a Discovery Service

Expect Single Search Versatility

All discovery services have a single search box, but only EDS gives you more flexibility and customization through a combination of profile options and search box widgets to simplify and enhance every search experience:

- ✓ Search dedicated subject profiles
- ✓ Option for advanced search
- ✓ Search box widgets for department websites
- ✓ Powerful known-item searching

Expect Better Search Results

EDS utilizes high-end indexing, as well as comprehensive full-text searching, to provide the best, most relevant results for a search query. Detailed indexing in EDS includes:

- ✓ **Subject headings**
- ✓ Journals/Sources
- ✓ Author(s)
- ✓ Article titles
- ✓ Author keywords
- ✓ Author abstracts
- ✓ Author affiliations
- ✓ Other robust detail...

Expect Superior Indexing from Top Subject Indexes

The overwhelming majority of important index-only databases do not participate in discovery services, for good reason. *Platform Blending* (which does not include federation), a characteristic unique to EDS:

- ✓ Seamlessly incorporates content from subject indexes as part of the EDS search experience
- ✓ Enhances the superior level of subject indexing provided through the EDS Base Index
- ✓ Provides exhaustive coverage in all subject areas

Expect More from a Research Experience

Many discovery services are more of a “portal” than a self-contained user experience. EDS offers features and functionality that users have become accustomed to with high-end research services:

- ✓ Superior facets
- ✓ Create folders
- ✓ Save searches
- ✓ Persistent links
- ✓ SmartLinks
- ✓ RSS feeds and email alerts
- ✓ Bibliographic management
- ✓ Citation formats
- ✓ Peer-review limiter (with accurate classification of peer-review status)

Expect a Discovery Service to Fit Your Library, Not Vice Versa

EDS uses technologies not found with other discovery services to provide a more enhanced custom discovery solution that meets your library’s needs:

- ✓ Toolbar links and labels
- ✓ Colors and branding
- ✓ Catalog relevancy weighting
- ✓ Mobile access (including iPhone App & Android App)
- ✓ Custom links
- ✓ Widgets
- ✓ Various profiles

Maximize the **Value** of Your Collection

Increase Usage and Bring Visibility to Your Library's Collection with *EBSCO Discovery Service™*

- ✓ Fast, simple access to all of the library's collection (electronic and print) in a single search box — Journals, Magazines, Newspapers, Books, Library Catalog (OPAC), Databases, Institutional Repositories and more
- ✓ Highest-quality metadata of any discovery service
- ✓ Inclusion of subject indexing from top indexes not available from other services
- ✓ The most complete list of partners of any discovery service
- ✓ Real-time availability checks and daily updates for your OPAC
- ✓ The only discovery service capable of leveraging controlled vocabularies for key subject indexes

The Only Full-Featured Research Experience for Discovery

- ✓ Powerful user experience on the most used platform
- ✓ Intuitive search-and-retrieval technology
- ✓ Fast, seamless access to available full-text content
- ✓ Basic and Advanced search options available
- ✓ Highly-refined relevancy-ranking algorithms for best results
- ✓ Persistent links, RSS and personalized folders for saving search criteria and results
- ✓ Comprehensive limiters and facets
- ✓ Extensive customization options, including branding, widgets and skinnability
- ✓ Enhanced OPAC records through the addition of related content

Get the Most Out of Your Entire Collection

In addition to superior metadata and a full-featured research experience, EDS brings greater value to your entire collection through enhanced relevancy ranking. The highly-refined relevancy ranking algorithms used through EDS retrieve the best and most useful articles and search results with every search, including backfiles, archives and other valuable content already available through your collection.

- Increase usage and usefulness of backfiles, archives and embargoed content
 - Reveal valuable content that may otherwise be buried within a result list
 - Provide researchers with a well-rounded search experience and a grander view of the library's collection
 - Rich metadata associated with a given book/article presents users with additional articles related to the original record (content-in-context)
-

EBSCO Discovery Service™ Brings Together the Most Comprehensive Collection of **Content**

Superior Base Index

The **EDS Base Index** represents content from approximately **20,000 providers** (and growing) in addition to metadata from another **70,000 book publishers**.

Although constantly growing, the EDS Base Index currently provides metadata for:

- More than **64,000 Magazines & Journals**
- Nearly **400,000 Conference Proceedings**
- More than **340 million Newspaper Articles**
- Nearly **6 million Books**
- **825,000 CDs & DVDs**

• Hundreds of thousands of additional information sources from various source-types, including:

- Biographies
- Book Summaries
- Case Studies
- Company Profiles
- Conference Papers
- Congressional Documents
- Country Fact Sheets
- Country Reports
- Dissertations
- Educational Reports
- Essays
- Financial Reports
- Government Documents
- Grey Literature
- Health Reports
- Industry Reports
- Law Documents
- Market Research Reports
- Newspapers
- Newspaper Columns
- Newswires
- Pamphlets
- Primary Source Documents
- Reviews
- State/Provincial Fact Sheets
- Study Guides
- SWOT Analyses
- TV & Radio News Transcripts
- Working Papers
- And More...

Superior Breadth of Coverage

EBSCO has an unprecedented number of partnerships with publishers, as well as database producers such as Baker & Taylor, NewsBank, Readex, Alexander Street Press, ABC-CLIO, JSTOR, LexisNexis, Thomson Reuters (Web of Science), and many others.

See [pages 12-29](#) for our growing partner list.

Superior Depth of Coverage

- Inclusion of rich metadata with subject indexing and abstracts from leading subject indexes, when subscribed to by libraries via *EBSCOhost* (not searched by other discovery services)
- Full-text searching of journals and books from the most academic publishers, magazines, and leading research databases, including *Academic Search™*, *Business Source®*, *Communication & Mass Media Complete™*, *CINAHL® with Full Text*, and dozens of others (none of which are available via competing discovery services—subscription required)

See how *Platform Blending™* increases usage of critical subject indexes for a deeper search experience – [pages 8-11](#).

Your Catalog and Custom Components

EDS customers can build upon the Base Index by adding metadata representing their own unique collections, including their catalog (OPAC), Institutional Repositories, databases, archival collections and more—allowing libraries to extend and enhance the solution to best fit their needs. Learn more about customization options on [pages 36-38](#).

See how EDS metadata yields the most relevant and comprehensive search results

Unsurpassed **Metadata** plus **Relevancy-Ranked Results** Yield the Best Possible Search Experience, Every Time

Unparalleled Depth of Indexing

EDS enables users to receive superior results because it allows them to search superior metadata. Side-by-side searches with other discovery services prove that EDS provides more in-depth indexing for the clear majority of journals and magazines. This means that high-quality subject indexing (from controlled vocabularies) is available, including massive backfiles in many cases. In addition, the unmatched quantity of searchable full text available via EDS is an important complement to its superior depth of indexing.

Highest-Quality Metadata of any Discovery Service

Unlike other discovery services that may primarily rely on "thin" metadata for their indexed content (mostly comprised of table of contents information/article titles), EDS draws upon EBSCO's extensive publisher relationships to feature a far more robust collection of rich metadata for most indexed content, including:

- Subject Headings
- Author Abstracts
- Author Keywords
- Author Affiliations
- Geographic Terms
- Full Text of Articles
- Article Titles
- Author(s)
- Journals/Sources
- And more...

Thin metadata will only take researchers so far, but the unsurpassed level of metadata offered by EDS helps to ensure that users can obtain the most relevant search results for their queries.

Not All Records Are Created Equal . . .

Other discovery services are built mostly on the combination of thin metadata (lacking subject indexing from controlled vocabularies) and full-text searching for a minority of journals and magazines. *EBSCO Discovery Service* not only includes more full-text searching, but also includes much more subject indexing than other services.

Relevancy-Ranked Results Speed Users to the Information that Matters Most

EDS search results are returned in order of relevance to quickly provide researchers with the information that is most applicable to their needs. To help ensure that search results are ranked in the most relevant order possible, EDS employs a comprehensive ranking system utilizing numerous criteria including (but not limited to) the following priorities:

- Match on subject headings from controlled vocabularies
- Match on article titles
- Match on author keywords
- Match on keywords within abstracts
- Match on keywords within **full text**

Full-Text Searching

EDS includes the ability to search within full-text documents from many sources, effectively increasing the searchable metadata for those resources significantly.

The unsurpassed level of metadata offered by EDS ensures that users will obtain the most relevant and comprehensive search results for their queries.

In addition to finding the best-possible search results via EDS's superior metadata, users have advanced options to do more with each search in EDS than in other discovery services: ▼

Sample record found in the EDS Base Index

- 1 Personal folders**
Organize articles of interest within personal folders—articles can be added or removed directly from the results list, preview pane or through the detailed record
- 2 Search History/Alerts**
Users can view and print their search history, retrieve searches and alerts, save searches/alerts, and more
- 3 Direct Full-Text Access**
When available, users have one-click access to PDF or HTML full-text content from the results list or through the detailed record
- 4 Images**
Thumbnail images provide a preview of graphical content within applicable PDF results
- 5 Enhanced User Tools**
Manage folders; print, email or save articles; view citation formats; bookmark/share content and much more with enhanced user tools

To learn more about the EDS user experience, see [page 36](#).

What Is *Platform Blending*, and Why Is It So Important?

The Discovery Dilemma

Leading subject indexes are critical components in an academic research environment. However, providers of these indexes overwhelmingly do not participate in discovery services (rightfully so). Due to the tremendous depth of coverage and level of indexing associated with these important indexes, discovery services are simply not viable replacements for these resources. The reality is that quality of searching would generally diminish without these indexes, and end users would be unaware of articles that would otherwise have been critical to their research.

The EBSCO Solution

EBSCO has developed its *Platform Blending* technology to infuse results from important subject indexes into the discovery experience for EDS users. This unique approach allows users to capitalize on the investments that libraries have made in these indexes, and maximize the value of the full suite of library resources. While these resources are not part of the EDS Base Index, it is important to realize that *Platform Blending* is NOT FEDERATION. Instead, it is a fast, local infusion of relevant results from the subject indexes to which a university subscribes on EBSCOhost.

Sample of subject-specific database usage at The University of North Carolina at Greensboro showing the number of records viewed (not searched)...

NOTE: 2011 statistics collected only through mid-October

Due to *Platform Blending*, EBSCO Discovery Service™ Increases Usage of **Critical Subject Indexes** that Other Discovery Services Disregard and Devalue...

Core Index Includes...

Millions of records from:

- ✓ Journals
- ✓ Magazines
- ✓ Books
- ✓ Industry reports
- ✓ Market research reports
- ✓ Working papers
- ✓ And more...

Your catalog

Your Institutional Repositories

A growing list of partners, such as:

- ✓ ABC-CLIO
- ✓ Alexander Street Press
- ✓ ARTstor
- ✓ British Library
- ✓ Credo Reference
- ✓ DOAJ: Directory of Open Access Journals
- ✓ HathiTrust
- ✓ JSTOR
- ✓ LexisNexis
- ✓ National Library of Economics (ECONIS)
- ✓ OALster
- ✓ Thomson Reuters (Web of Science)

Platform Blending infuses relevant results from important **subject indexes**, adding great value to the EDS experience (subscriptions via EBSCOhost required)

America: History and Life™
Art Abstracts™
ATLA Religion Database™
Avery Index to Architectural Periodicals
CINAHL®
EconLit™
GeoRef™
Historical Abstracts™
Inspec®
International Political Science Abstracts
The Philosopher's Index™
And many others...

The above represent examples of subject indexes that can be "blended" into the EDS experience

The end results for researchers using EDS is a combination of relevant core content from the EDS index "blended" with the high-end results from critical subject indexes.

Important Resources Available through EDS via *Platform Blending**

With the ability to include dedicated subject-specific databases (to which a library subscribes on the EBSCOhost® platform)—as well as metadata from thousands of sources available through the EDS Base Index—EDS is by far the most comprehensive discovery service for research across key subject areas...

The Most Comprehensive List of **Information**

The robust metadata offered by EDS is culled from nearly all major journal publishers as well as an extensive collection of non-journal publishers, including (but not limited to) the following: ▼

Publisher / Information Provider	Sources Included	All Available Backfiles Included	Metadata to Be Searched Once Loaded	Timing of Availability of Metadata
ABC-CLIO	All eBooks and all databases	Yes	Full Text Searching for All eBooks & Databases; Subject Indexing for All Databases	Everything provided by the publisher should be loaded by Summer 2012
Academic Commons: Columbia University Libraries	All sources	Yes	Metadata for the articles and monographs, working papers, preprints, technical reports, conference papers, datasets, multimedia creations, and other materials in various digital formats found within Academic Commons	Everything is loaded and available now for end users
Academy of Management	All journals and proceedings	Yes	Full Text Searching for All Journals & Proceedings and All Journals & Proceedings with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
Accessible Archives	All historical digital archives	Yes	Full Text Searching and Controlled Vocabularies for all twelve collections: <ul style="list-style-type: none"> • African American Newspapers • American County Histories to 1900 I: Mid-Atlantic States • American County Histories to 1900 II: New England States • The Civil War, Part I: A Newspaper Perspective • The Civil War, Parts II-V • Godey's Lady's Book • The Liberator • The Pennsylvania Gazette • The Pennsylvania Genealogical Catalogue • The Pennsylvania Newspaper Record • South Carolina Newspapers • The Virginia Gazette 	Everything is loaded and available now for end users
Acoustical Society of America	All journals and proceedings	Yes	Full Text Searching for All Journals & Proceedings; All Journals with Subject Headings from Various EBSCO Databases	Awaiting data from publisher, content will be processed as soon as received

* Metadata for any provider identified with this asterisk is for mutual customers only

Providers of Any Discovery Service...

Publisher / Information Provider	Sources Included	All Available Backfiles Included	Metadata to Be Searched Once Loaded	Timing of Availability of Metadata
ACP Publishing PTY Limited	All magazines	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
Adam Matthew Digital	All primary source collections and works	Yes	All indexing and full text from all primary source collections and works	Everything provided by the publisher should be loaded by Fall 2012
ADIS International Limited	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
Administrative Science Quarterly	<i>Administrative Science Quarterly</i>	Yes	Full Text Searching for <i>Administrative Science Quarterly</i> along with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
Advanstar Communications Inc.	All journals and magazines	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
African Journals Online (AJOL)	All journals	Yes	Metadata from African Journals Online (AJOL) containing African-published journals, publishing in a range of academic disciplines	Everything is loaded and available now for end users
Akadémiai Kiadó Zrt.	All journals	Yes	Full Text Searching for All Journals; Some Journals with Subject Headings from Various EBSCO Databases	Awaiting data from publisher, content will be processed as soon as received
ALADIN Research Commons	All sources	Yes	Metadata from The ALADIN Research Commons maintained by the WRLC (Washington Research Library Consortium). The WRLC provides a shared digital institutional repository for its member institutions, e.g., American University, Gallaudet University, and Georgetown University.	Everything is loaded and available now for end users

List is current as of 5/24/2012. Call your sales representative for most current list.

Publisher / Information Provider	Sources Included	All Available Backfiles Included	Metadata to Be Searched Once Loaded	Timing of Availability of Metadata
Alexander Street Press	All available archive and reference databases	Yes	Standard metadata for more than 80 collections, including music, video, and image collections; new Alexander Street Press products are added as they become available	Everything is loaded and available now for end users
Allen Press Publishing Services Inc.	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
American Association for the Advancement of Science	<i>Science, Science Signaling, and Science Translational Medicine</i>	Yes	Full Text Searching for All Titles; Some Titles with Subject Headings from Various EBSCO Databases	Awaiting data from publisher, content will be processed as soon as received
American Bar Association	All journals and magazines	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
American Chemical Society	All journals	No	Author Supplied Abstracts and Author Keywords for All Journals; Some Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
American Counseling Association	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
American Economic Association	All journals	Yes	Full Text Searching for All Journals (and backfiles), plus subject headings from EBSCO databases for the top three journals. NOTE: <i>EconLit</i> ™ is not included, but if a library has a subscription to <i>EconLit</i> ™ via <i>EBSCOhost</i> , it can be integrated into EDS through <i>Platform Blending</i> ™ (which is true high-performance discovery and NOT federation).	Everything is loaded and available now for end users
American Institute of Physics	All journals and proceedings	Yes	Full Text Searching for All Journals & Proceedings; All Journals with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
American Library Association	All journals	No	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
American Mathematical Society	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
American Meteorological Society	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
American Psychiatric Publishing, Inc.	All journals	Yes	Full Text Searching for All Titles and All Titles with Subject Headings from Various EBSCO Databases	Awaiting data from publisher, content will be processed as soon as received

* Metadata for any provider identified with this asterisk is for mutual customers only

Publisher / Information Provider	Sources Included	All Available Backfiles Included	Metadata to Be Searched Once Loaded	Timing of Availability of Metadata
American Psychological Association	All journals from <i>PsycARTICLES</i> , as well as databases including <i>PsycBOOKS</i> and <i>PsycCRITIQUES</i>	Yes	Full Text Searching for All Records in <i>PsycARTICLES</i> , <i>PsycBOOKS</i> and <i>PsycCRITIQUES</i> . NOTE: <i>PsycINFO</i> is not included, but if a library has a subscription to <i>PsycINFO</i> via <i>EBSCOhost</i> , it can be integrated into EDS through <i>Platform Blending™</i> (which is true high-performance discovery and NOT federation).	Everything is loaded and available now for end users
American Society of Civil Engineers	All journals	Yes	Full Text Searching for All Titles and Some Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
American Society of Mechanical Engineers (ASME)	All journals	No	Author Supplied Abstracts and Author Keywords for All Journals; Some Titles with Subject Headings from Various EBSCO Databases	Everything available is loaded and available now for end users
American Statistical Association	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
Annual Reviews Inc.	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
AnthroSource	All journals	Yes	Full Text Searching for All Journals; Most Journals with Subject Headings from Various EBSCO Databases	Awaiting data from publisher, content will be processed as soon as received
AP Image Collection (Associated Press)*	<i>AP Photo Archive</i> and <i>AP Interactives Archive</i>	Yes	All available metadata for all photos and multimedia sources for mutual customers	Awaiting data from publisher, content will be processed as soon as received
Apabi E-Books [Chinese]	All eBooks	Yes	Full Text Searching for All eBooks including Standard Metadata Provided through MARC Records	Awaiting data from publisher, content will be processed as soon as received
ArchiveGrid*	All contributing archives	Yes	Metadata for all finding aids	Everything is loaded and available now for end users
ARTstor*	All images	N.A.	Indexing for all images contained in the ARTstor Digital Library	Awaiting data from publisher, content will be processed as soon as received
arXiv	All working papers	Yes	Metadata for 600,000 working papers maintained by Cornell	Everything is loaded and available now for end users
Asian Network for Scientific Information	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
Associated Press	All current newswire articles	No	Full Text Searching	Everything is loaded and available now for end users

TEL French eTheses ©HAL	All theses and dissertations	Yes	Metadata for online theses from a large number of French universities as a project of the Centre pour la Communication Scientifique Directe (CCSD) of the Centre National de la Recherche Scientifique	Everything is loaded and available now for end users
TEMA [German]	All journals, conference papers, and reports	Yes	All available indexing, abstracts, and TOC	Awaiting data from publisher, content will be processed as soon as received
Thieme Medical Publishing Inc.	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
Thomas Telford Ltd	All journals, conference proceedings & books	Yes	Full Text Searching for All Titles and Some Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users, additional content being added

Publisher / Information Provider	Sources Included	All Available Backfiles Included	Metadata to Be Searched Once Loaded	Timing of Availability of Metadata
Time Inc.	All magazines	Yes	Full Text Searching for All Titles and All Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
T-Space, University of Toronto's Research Repository	All sources	Yes	Metadata from the intellectual digital products of the University of Toronto faculty	Everything is loaded and available now for end users
U.S. News Digital Weekly (formerly U.S. News & World Report)	<i>U.S. News Digital Weekly</i>	Yes	Full Text Searching for <i>U.S. News Digital Weekly</i> , including Subject Headings from Various EBSCO Databases	Awaiting data from publisher, content will be processed as soon as received
U.S. Patent & Trademark Office	<i>AppFT</i> and <i>PatFT</i> Patent Databases	Yes	Full Text Searching and Specialized Indexing for All Available Patents and Applications	Awaiting data from publisher, content will be processed as soon as received
UCL Discovery	All working papers	Yes	Metadata for the working papers of University College London (UCL)	Everything is loaded and available now for end users
United Press International	All current newswire articles	No	Full Text Searching	Awaiting data from publisher, content will be processed as soon as received
University of Alabama Press	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
University of Chicago Press	All journals & books	Yes	Full Text Searching for All Journals & Books; Most Journals with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
University of Illinois Press	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
University of Nebraska Press	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users
University of North Carolina Press	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
University of Pennsylvania Press	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
University of Queensland Press	All journals	Yes	Full Text Searching for All Titles and Most Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
University of Texas Digital Repository (UTDR)	All sources	Yes	Metadata for the scholarly and research works of the University of Texas at Austin, as well as works that reflect the intellectual and service environment of the campus	Everything is loaded and available now for end users

* Metadata for any provider identified with this asterisk is for mutual customers only

Publisher / Information Provider	Sources Included	All Available Backfiles Included	Metadata to Be Searched Once Loaded	Timing of Availability of Metadata
University of Toronto Press	All journals	Yes	Full Text Searching for All Titles and All Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
University of Washington Libraries Digital Collections	All sources	Yes	Metadata for materials from University of Washington faculty and departments, and organizations that have participated in partner projects with the UW. Collections are primarily pictorial, although some have accompanying essays and text. Other media are presented, such as newspapers, reports, pamphlets, posters, and maps.	Everything is loaded and available now for end users
University of Wisconsin Digital Collections (UWDC)	All sources	Yes	Metadata from quality digital resources from University of Wisconsin academic libraries to UW faculty, staff, students, citizens of the state, and scholars at large	Everything is loaded and available now for end users
University of Wisconsin Press	All journals	Yes	Full Text Searching for All Titles and All Titles with Subject Headings from Various EBSCO Databases	Awaiting data from publisher, content will be processed as soon as received
VSP International Science Publishers	All journals	Yes	Full Text Searching for All Titles and All Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
Web of Science and Citation Indexes*	Web of Science / Citation Indexes	Records added from 1989 to present	All Content Available through Web of Science, including: <ul style="list-style-type: none"> • Arts & Humanities Citation Index • Science Citation Index • Science Citation Index Expanded • Social Sciences Citation Index 	Everything is loaded and available now for end users
Wiley-Blackwell	All journals and all books & reference works	Yes	Full Text Searching for All Journals & Books; Most Journals with Subject Headings from Various EBSCO Databases	Everything provided by the publisher is loaded and available now for end users, books to be loaded by Spring 2012
World Book Online	All of World Book Online	Yes	All available metadata and full text searching for all World Book Online resources, including: <ul style="list-style-type: none"> • <i>World Book Kids</i> • <i>World Book Student</i> • <i>World Book Advanced</i> • <i>World Book Discover</i> • <i>World Book Online for Kids</i> • <i>World Book Online Info Finder</i> • <i>World Book Online Reference Center</i> • <i>Living Green</i> • <i>Early Peoples</i> • <i>Inventions and Discoveries</i> • <i>L'Encyclopedie Decouverte</i> • <i>Enciclopedia Estudiantil Hallazagos</i> 	Awaiting data from publisher, content will be processed as soon as received
World Scientific Publishing Company	All journals	Yes	Full Text Searching for All Titles and All Titles with Subject Headings from Various EBSCO Databases	Everything is loaded and available now for end users
Yale Medicine Thesis Digital Library	All theses and dissertations	Yes	Metadata from all theses, starting with the School of Medicine graduating class of 2002	Everything is loaded and available now for end users

In addition, any of the following resources can be **included in the EDS search experience** if an institution subscribes to them via *EBSCOhost*.

- *AgeLine*[®]

Customers Using VuFind or Other Custom Discovery Tools Can Take Advantage of the **Enhanced API Access** for *EBSCO Discovery Service*[™]

Make the most out of your discovery solution when you connect to EDS through EBSCO's enhanced API. Subscribers will have access to the full metadata from many of the most highly-used databases in academic libraries, ensuring that the content from these important resources is available to your researchers through your custom discovery tool.

The Most Powerful, Fully-Customizable Search Experience

Superior, Full-Featured Platform

Institutions seeking a discovery service with the highest level of quality metadata shouldn't have to sacrifice any aspects of the overall user experience. Not only does *EBSCO Discovery Service* feature the most robust collection of metadata, it is also built upon the industry-leading *EBSCOhost* search interface that is already familiar to millions of researchers around the world.

Unlike other discovery services that "discover" content from various resources and then force users to link over to a completely different service/interface to view the full text, most content that is discoverable by EDS is also presented directly to the user as part of the *EBSCOhost* search experience. This allows for an intuitive, familiar search experience and requires far less training and support than other discovery/federated search services that utilize more obscure platforms.

Some of the many features that EDS offers via the *EBSCOhost* interface include:

- Limiters (full text, date slider, peer-reviewed, etc.)
- Facets/Clustering (subjects, source types, publications, authors, etc.)
- De-duplicated & Consolidated Records
- Persistent Links
- RSS Feeds
- Bookmarkable Results
- Skinnable Interface
- Widgets (Importable & Exportable)

The screenshot shows the EBSCOhost search interface for the University of Georgia Libraries. The header includes navigation links like 'New Search', 'UGA Libraries', and 'Get GALILEO Password'. The main search area features a search bar with the text 'Searching: University Library Collection' and a 'Search' button. Below the search bar are 'Search Options' and subject-specific buttons for 'Science & Engineering', 'Social Sciences', 'Health & Life Sciences', and 'Humanities'. Callout boxes highlight three features: 'Custom Toolbar' (link wording and destination), 'Enhanced Branding' (library collection name), and 'Topic-Based Searches' (subject-specific profiles).

Custom Toolbar
You decide the link wording and destination

Enhanced Branding
Choose the name of your library collection

Topic-Based Searches
Create customized subject-specific profiles to enable easy topic-based searching for end users

Customize your Discovery experience through Open Integration options

Enhanced Branding

Bring more visibility to your library and institution brand

Library Holdings

Limiter available when catalog is loaded

Checkboxes

Apply multiple facets to filter results

Skinnability

Choose the color combinations of the interface & font sizes

The screenshot displays the University of Georgia Libraries Discovery interface. At the top, there's a search bar with the text 'University Library Collection' and a search button. Below the search bar, there are navigation links like 'New Search', 'UCA Libraries', 'Get CALIBRO Password', 'Ask a Librarian', and 'A to Z Publications Locator'. The main content area shows search results for 'Global Warming' with four entries. Each entry includes a title, author, and a brief abstract. The interface is highly customizable, with various facets on the left side for filtering results, such as 'Publication Date', 'Subject', and 'Publication'. On the right side, there are options for 'Integrated Search' and 'Related Images'. The interface is branded with the University of Georgia logo and name.

Import pieces of functionality into the user experience—or export bits of EBSCOhost to your website

Complete Integration of Local Collections (Catalog, IRs, etc.)

In many ways, a discovery service is only as good as its ability to effectively “discover” what an institution holds in its own local collection. One of the most fundamental services provided by EDS is the loading of an institution’s complete catalog so that it can be searched alongside all other EDS content as part of the unified search experience.

Institutional Repositories (IRs) can also be directly loaded into EDS in a similar fashion so that they can be fully searched alongside all other EDS resources/content.

The Most Complete OPAC Search Experience:

- Real-time availability checks
- Daily updates for catalog changes
- Enhanced book indexing provided by Baker & Taylor
- Full-text searching of relevant book content via EBSCO’s eBook collections
- Enhanced catalog records featuring book jacket images, subject headings, availability information, awards, review citations, and more . . .
- Ability to search multiple/shared catalogs (e.g., consortia) with detailed holdings information for all relevant locations provided (catalog sharing is only available among EDS customers)

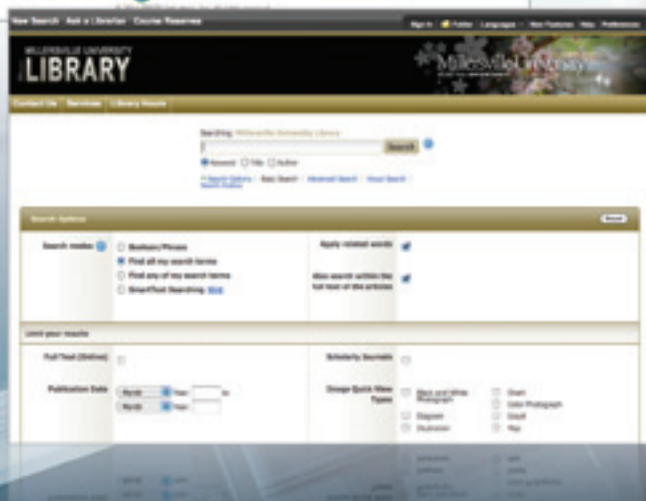

EDS Customization Features

Customize Your Discovery Experience

As no two institutions are the same, *EBSCO Discovery Service* offers a vast array of customization options with regard to both the underlying collection of metadata as well as the front-end delivery of search results. All of this functionality is built upon the powerful *EBSCOhost* search experience familiar to researchers worldwide.

Here's how some libraries are making the most out of their customization options...

UNIVERSITY OF
LIVERPOOL

Chooses

Providing a Fresh Look for Library Resources and Easy Access for Users

The University of Liverpool has selected *EBSCO Discovery Service* (EDS) as its discovery solution. The university was looking to offer a search tool that would take its users from their initial search into pertinent results via a single search box.

Beyond Federation

Prior to the implementation of EDS, the library had been relying on a federated search option but was looking for a more complete solution that would provide access to local resources, including the ability to cross-search locally-owned resources with licensed resources while also including Institutional Repository content in general search results. At the same time, the library saw discovery and a single search box approach as a way to meet the needs of users who are accustomed to searching Google or Wikipedia, but who really needed to find the reliable academic content in library resources.

Discovering EDS

Discovery was an interesting concept for University of Liverpool librarians, and they looked to determine the issues a discovery solution would need to overcome. To the librarians at the University of Liverpool, those issues included the difficulty end users might have being sure what the service was searching and what it wasn't; making sure the metadata was sufficiently well-structured to make reliable OpenURL links—even difficult deep links; and finding a balanced way to treat relevancy ranking algorithms to ensure that users were seeing the most relevant results in the framework of a large, single, all-encompassing database.

A Unified Solution for Every Researcher

In introducing a discovery service, the library was looking to cater to a wide spectrum of users, from novices to more advanced users. University of Liverpool Electronic Resources Manager, Terry Bucknell, says the EDS approach gave the university the best of both worlds. "On one hand, we have a single search that quickly gives a useful set of relevant hits from named sources. It shows our users which sources yield the most hits so that librarians have an 'upgrade path' to wean users onto searching key A&I databases using advanced search techniques. It also gives us the ability to include federated search results when we have resources that we know can't be included in discovery tools."

Creating a Tailored Search Experience

Liverpool will use EDS as the main search box on its home page along with an upgraded OPAC. The library will use the multiple profile option in *EBSCO Discovery Service* to provide comprehensive coverage for given subjects. University of Liverpool subject librarians want to be sure that they are directing their users to a resource that gives them comprehensive coverage without overwhelming them with irrelevant hits. With EDS, subject librarians can tweak the look and feel and provide customizable search and display options to suit "their" clientele. Subject-specific LibGuides will be implemented at the University of Liverpool along with profile-specific EDS search boxes serving as anchors to more specific lists of subject resources.

Hosted Content on a Familiar Platform

Leveraging the well-known *EBSCOhost* interface as the foundation of *EBSCO Discovery Service*—including resources such as *SmartLinks*™ and *Image Quick View*™—is another way that EDS is able to provide comprehensive coverage for the end user. Bucknell says, "An added bonus is the way that EDS can use EBSCO-hosted content to give full-text links that are guaranteed to work and to include images from articles in search results."

Superior Metadata

The EDS Base Index is comprised of metadata from the world's foremost information providers. At present, the EDS Base Index represents content from approximately 20,000 providers in addition to metadata from another 70,000 book publishers. Although constantly growing, today the EDS Base Index provides metadata for more than 64,000 magazines & journals, 825,000 CDs & DVDs, nearly six million books, more than 320 million newspaper articles, nearly 400,000 conference proceedings and hundreds of thousands of additional information sources from various source-types.

Support, Training and Services for EBSCO Discovery Service™

EBSCO offers a dedicated *EBSCO Discovery Service* Support Center for all customers through the EBSCO Support Site, providing access to Discovery product overviews, training information, implementation assistance, ideas for branding and customization options, links to frequently asked questions, support guides and much more.

Comprehensive Training and Support Coverage

Through our Customer Satisfaction team, we offer numerous complimentary training options, including context-specific tutorials, support guides and recordings on a variety of EDS-related topics; online training sessions; as well as customized and on-site trainings.

In addition to training information provided through the dedicated EDS Support Center, all customers worldwide have access to a toll-free Customer Support line seven days a week, and receive knowledgeable and timely responses to their service inquiries via phone, email or the Support Site.

EBSCO Discovery Service Mobile

- ✓ Designed for usability on small devices
- ✓ Optimized for smartphones (iPhone, BlackBerry, Android, etc.)
- ✓ Focused on core searching and viewing functions
- ✓ No additional charge
